

# The fontawesome package

## High quality web icons

Xavier Danaux<sup>\*</sup>([L](#)<sup>A</sup>T<sub>E</sub>X code)  
Dave Gandy<sup>†</sup>(font design)

Version 4.6.3.2, released on May 22, 2016

### Abstract

The fontawesome package grants access to 634 web-related icons provided by the included *Font Awesome* font, designed by Dave Gandy and released under the open SIL Open Font License.

This package works both with X<sub>Y</sub>([L](#)<sup>A</sup>T<sub>E</sub>X) and Lua([L](#)<sup>A</sup>T<sub>E</sub>X) (using `fontspec` to load the included original `otf` font), as well as (pdf)([L](#)<sup>A</sup>T<sub>E</sub>X) (using an included `type1` conversion and character mapping of the font).

## 1 Introduction

The fontawesome package aims to enable easy access in ([L](#)<sup>A</sup>T<sub>E</sub>X) to high quality icons covering web application, transportation, gender, file type, spinner, form control, payment, chart, currency, text editor, directional, video player, brand and medical pictograms. It is a redistribution of the free (as in beer) *Font Awesome* font with specific bindings for ([L](#)<sup>A</sup>T<sub>E</sub>X).

<sup>†</sup>URL: [fontawesome.io](https://fontawesome.io); Licence: [SIL Open Font License, version 1.1](#).

## 2 Requirements

The fontawesome package requires the fontspec package when using the Xe<sub>L</sub>LaTeX or Lua<sub>A</sub>TeX engines to load the included otf font. When using the (pdf)LaTeX engine, the fontawesome package doesn't require any external package.

## 3 Usage

`\faicon` Once the fontawesome package loaded, icons can be accessed through the general `\faicon`, which takes as mandatory argument the *(name)* of the desired icon, or through a direct command specific to each icon. The full list of icon designs, names and direct commands are showcased in section 4.
